Date of Release: 7/2/2018

Time of Release: 11:30 AM

The Iredell County Health Department's mission is to promote and protect personal, community, and environmental health. The health and safety of Iredell County residents is a top priority of the Health Department. The Iredell County Health Department has created a website for information regarding the Thyroid Cancer study in the 28115 and 28117 zip codes to ensure all residents have access to information regarding the health status of this community. This website includes all press releases, a frequently asked questions document and a timeline of how and when Iredell County became aware of the issue. Any future information that Iredell County Government receives regarding this issue will be posted to this website as well. You can find this information at <https://www.co.iredell.nc.us/1255/Thyroid-Cancer-Information>. If you have any medical questions or health concerns please contact your medical provider. If you have any questions regarding the public health investigation please contact 704 878-5300.
