

Iredell County Recreation Center

Attestation Form – Parent/Guardian of Minor (Age -18)

Child's First Name: _____

Child's Last Name: _____

Parent / Guardian
First Name: _____

Parent / Guardian
Last Name: _____

1. Has your child had had close contact (within 6 feet for at least 15 minutes. This could have been a 15 minute conversation or several shorter conversations that total at least 15 minutes) in the last 14 days with someone diagnosed with COVID-19, or has any health department or health care provider been in contact with you and advised you to quarantine?

- Yes – The child should not be at the Center. The child may return 14 days after the last time he/she had close contact with someone with COVID-19, or as listed below.
- No – The child can be at the Center if the child is not experiencing symptoms.

2. Do any of the children you are dropping off have any of these symptoms:

- Fever
- Chills
- Shortness of breath or difficulty breathing
- New cough/itchy throat
- New loss of taste or smell
- GI Issues
- Stuffy Nose

If any child has any of these symptoms, they should go home, stay away from other people, and the family should call the child's health care provider.

3. Since they were last at the Center, have any of the children been diagnosed with COVID-19?

- Yes
- No.

If a child is diagnosed with COVID-19 based on a test, their symptoms, or does not get a COVID-19 test but has symptoms, they should not be in at the Center and should stay home until they meet the criteria below.

COVID-19
SPECIFIC:

A child may be able to return to the Center when a parent or guardian can ensure that they can answer YES to ALL three questions:

- Has it been at least 10 days since the child first had symptoms?
- Has it been at least 24 hours since the child had a fever, without using fever-reducing medicine?
- Has there been symptom improvement, including cough and shortness of breath?

If child has had a negative COVID-19 test, they can return to the Center once there is no fever without the use of fever-reducing medicines and they have felt well for 24 hours.

If a child has been diagnosed with COVID-19 but does not have symptoms, they should remain out of the Center until 10 days have passed since the date of their first positive COVID-19 diagnostic test, assuming they have not subsequently developed symptoms since their positive test.

If a child has been determined to have been in close contact with someone diagnosed with COVID-19, he/she should remain out of the Center for 14 days since the last known contact, unless he/she test positive. In which case, criteria above would apply. Child must complete the full 14 days of quarantine even if he/she test negative.

A child may return to the Center, if they receive confirmation of an alternative diagnosis from a health care provider that would explain the COVID-19 like symptom(s), once there is no fever without the use of fever-reducing medicines and they have felt well for 24 hours.

I am the parent and/or legal guardian of the child named above and I attest that this information is true to the best of my knowledge as of:
