Iredell County has established farmland preservation districts to protect and preserve agriculture lands and activities. These districts have been developed and mapped by the County to inform all purchasers of property that certain agriculture activities, including but not limited to pesticide spraying, manure spreading, machinery and truck operations, feedlot operations, weaving and similar activities may take place in these districts anytime during the day or night. Official maps and information on the location and establishment of these districts can be obtained from the Iredell County Planning Department.
